Learning: BootStrap, Swift

EXPERIENCE AND ACTIVITIES

CS 61A Tutor — June 2017 - Present

- Mentor groups of students and teach students one-on-one to strengthen understanding of core concepts
- Proctor, grade, and design exams; grade project composition and style; plan exam review sessions

Computer Science Mentors, Senior Mentor — January 2017 - Present

- Mentor a weekly section of five CS 61A students to reinforce course material
- Lead weekly meetings with junior mentors to discuss worksheets and give teaching advice
- Collaborate with senior mentors to create worksheets and teaching guides

Association of Women in EECS, CS KickStart Organizer (Industrial Relations, Lab Teacher)— August 2016 - Present

- Previous participant for CS KickStart, a week long program for 30 freshmen women in Computer Science
- Contact and connect with company sponsors for CS KickStart 2017
- Teach Python basics and help participants in completing a photo collage coding project

Cognitive Exchange, President, Instructor, Technology Officer — June 2013 - August 2016

(<http://cognitiveexchange.org/>)

- Taught intermediate and advanced speech classes to over 200 middle school to college students in India through virtual one hour classes
- Recruited and organized training sessions for over 10 new instructors and planned quarterly teaching schedules: *900% growth rate in students taught from 2014*

PROJECTS

Bear Maps (CS 61B) — March 2017

- Using Java, implemented the backend of a web mapping application that allows users to zoom into and navigate a map of Berkeley
- Finds the shortest route between two locations and includes an autocomplete search feature

Database (CS 61B) — February 2017

- Built a database management system using Java that allows users to create, store and load tables, insert values into tables, and merge multiple tables together with different conditions

Scheme Interpreter (CS 61A) — November 2016

- Used Python to build an interpreter for a subset of the Scheme language that includes primitive expressions, user-defined expressions, dynamic scoping, and supports tail calls

AWARDS

- Berkeley Leadership Award, 2016
- National AP Scholar, 2016
